

FernoTron Receiver

Plug switching unit

Overview of advantages

- HF receiver for electrical appliances with a mains plug:
Receives, stores and executes the switching times set by the FernoTron central operating units
- Execution of automated solar functions by means of the radio solar sensor
- Execution of the "Astro" function
- Manual operation on site by means of a operating key on the underside of the housing
- Simple to install:
Plug into a 230 V socket

2426

Technical specifications

Item number	2426
Dimensions (LxWxB)	96 x 63 x 50 mm
Supply voltage	230 V / 50 Hz
Switching current	16 (4) A
Protection class	II
Receiving frequency	433.92 MHz
Standby consumption	2 w
Power reserve	approx. 2 hrs
Complies with the European Low Voltage Directive and EMC Directive
